

CAPITALISM AND THE FREE MARKET

DID YOU KNOW...

1. To pay for an unprecedented government spending spree, the Biden administration is seeking to excessively raise individual, corporate, and capital gains tax rates which will severely hinder both the stock market and our ability to compete globally?¹
2. To date, Biden is proposing to spend \$6 trillion of your dollars — that's \$6,000 billion — to massively expand the government's reach and create a federal machine capable of controlling the lives of everyone in this country?²

For this President, spending is the name of the game. The era of big government is certainly upon us as the rise of federal oversight, taxation, and reckless spending soars to new heights with each passing day. The truth is clear — we are incurring a debt that our children and grandchildren will not be able to bear.³ Despite what some of our Democratic leaders in Washington may say, the way forward is not to spend without limit on their pet projects and wasteful excess. We need to act now.

Will you join us? Will you jump into the fray and refuse to let our President plunge us further and further into foolish debt without thought to the ramifications our children will have to endure? The time is now to take a stand.
